

Policy templates are of valuable help; adding and removing devices has been simplified and their power has been enhanced. Now, any device linked to the template can be updated when the policy is modified. Furthermore, import and export features have been built in.

Smart Management Packs

The following SMP's are available:

- Cisco Switches
- Cisco VPN Concentrators
- Cisco Routers
- Cisco PIX/ASA
- Cisco Wireless
- HP ProCurve Switches
- F5 Big IP
- Linux Servers
- Solaris Servers
- IBM AIX Server
- VMWare Virtual Center
- Linux MySQL
- APC UPS
- Generic Network Device
- Availability (ICMP only)

Xian Io for SCE can also receive Syslog messages. You can set up filters and add specific knowledge for those messages which you want to be forwarded to System Center Essentials.

A new set of reports for System Center Essentials Reporting is also available, bringing the possibility of performing any needed trend analysis on the retrieved performance data.
